🌐 devrahulbanjara

Summary

Machine Learning Engineer with hands-on experience in developing end-to-end solutions leveraging deep learning, machine learning, computer vision and natural language processing. Skilled in Python, PyTorch, and TensorFlow with a solid mathematical foundation.

Experience

AI Fellowship 2024, Fusemachines

March 2024 – Sep 2024

Fellow (Remote), New York, NY

- Tackled real-world problems through hands-on AI and ML projects.
 - Experimented with CV and NLP models for innovative solutions.
 - Developed and evaluated pipelines for deploying ML models.
-

Projects

Document and Record Management

2024

A system for verifying the authenticity of Nepali documents (Citizenship, Driving License, Passport) against a government database.

Paraphrase Generation using Transformers

2024

Created a paraphrasing tool using fine-tuned Transformer models for accurate English text rephrasing.

DocuQ&A

2024

Built a PDF interaction tool that allows users to upload documents and query their content using AI-driven answers.

Education

BSc (Hons) in Computer Science

Herald College Kathmandu

2023 – Present

High School Diploma (Science)

Capital College and Research Center

2020 – 2022

Secondary Education Examination (SEE)

Meridian International School

2010 – 2020

Extracurricular Activities

Member, AI Learners Community

April 2024 – Present

Engaged in hands-on AI projects and community-led workshops.

Explored advanced concepts like Generative AI and Prompt Engineering.

IT Head, CCRC Prime Innovative Club

Dec 2020 – June 2022

Led website development and managed digital assets for marketing.

Debugged and led development tasks for various web projects.

Certifications

Machine Learning Specialization – DeepLearning.AI

Python 3 Specialization – University of Michigan

Skills

Languages: Python, Java

Tools: PyTorch, TensorFlow, FastAPI, Git, MySQL

Other: Deep Learning, Computer Vision, NLP
